

# **What To Do If You've Been In A Car Accident**

# STEPS TO TAKE AFTER A CAR ACCIDENT

- **Check for Injuries & Move Your Vehicle (If Possible to a Safe Location)**

Before you do anything else after a crash, the very first thing you should do is to move your vehicle to a safe location. Then, make sure everyone in your vehicle and the vehicle of the other driver is okay.

- **Call the Police and File an Accident Report**

Regardless of whether or not anyone in either vehicle is injured, you need to call the police on the spot. When police arrive on scene, file an accident report.

- **Exchange Information with the Other Driver**

While you are waiting for the police to arrive, take advantage of the time to exchange information with the other driver.

- **Take Photos**

If you have a smartphone or camera on you, take as many photos of the accident scene and damages as you can.

- **Seek Medical Care**

If you are not transported to the hospital in an emergency vehicle from the scene of your accident and are given the go-ahead from police officers to leave, your first stop should be at the hospital or your doctor's office.

- **Seek Medical Care**

You must inform your insurance company of the accident as soon as possible after the accident, and preferably within 24 hours.
